

The **C40S** is a heavy duty Fluid Action Head specifically designed to support **FILM** and **STUDIO** cameras weighing up to 40 kg (88 lbs).

Counterbalance mechanism is activated by an 8-position easy grip selector, while the fluid control system allows the damping levels to range from "0" for free wheeling to 7 for maximum drag on both pan and tilt modes. Standard features include the quick-release camera plate with safety lock, two adaptable telescopic pan bars and illuminated spirit level.

The head comes equipped with a flat Mitchell base, and options include a **150MM** bowl base and the eye piece extension holder. For **STUDIO/OB** configurations weighing up to 50 Kg (110 lbs), **C60S** offers an extremely cost-effective option. **C40S** and **C60S** interface directly with the Studio tripod series or the Heavy Duty tripods for extra ruggedness.
